

AN/BLQ-10A(V) Wideband Signal Processor (\$6,000,000). I would ban earmarks as we know them, but as long as these earmarks are available, I'm going to apply for them in an effort to pursue federal funding opportunities for my district. For defense projects in the current earmarking system, the individual projects I sponsor have the support of our military and further our national security. These projects are vetted by the professional staff on the House Armed Services and House Appropriations Committees during the appropriations process. I only request funds for projects authorized by law for federal funding and do not do so for private parties or entities. This project will enhance the AN/BLQ-10A(V) wideband signal processor capability to counter advancements in threat radars with dual use sensors to improve performance, increase reliability, and maintain an edge in the global war on terrorism. This is a valuable use of taxpayer funds because the resulting system improvements will greatly enhance the submarine's ability to rapidly detect and respond to emerging threats. Beneficiary: NAVSEA PMS-4352, AN/BLQ-10 Program Office, 614 Sicard ST SE, Washington Navy Yard, DC 20376.
